- pattalath (H), palluruthy

## PROFILE SUMMARY

Adaptable Python web developer with experience in crafting dynamic and user-friendly web applications. Enthusiastic about embracing new technologies and environments, with a focus on continuous learning and growth. Committed to contributing to impactful projects while expanding my skill set in modern web development practices.

## EDUCATION

2021 - 2024  
MG UNIVERSITY

- Bachelor of Computer Application

## PROJECT

### Gym vault

- This project is designed for managing an e-commerce platform that sells gym supplements and equipment. It includes functionalities for adding and categorizing brands, supplements, and equipment, with a modern user interface for seamless navigation and management.

### NexGen

- NexGen is a modern educational institute website designed with a responsive layout to provide seamless access across all devices. It offers features like course listings, student portals, and event updates, ensuring an intuitive and user-friendly experience for students and faculty alike.

### Alensolly website (clone)

- A design-only clone of the Allen Solly website, showcasing a clean layout with product grids and a focus on user-friendly navigation.

### Book my show website (clone)

- A clone of BookMyShow, showcasing a modern, user interface for movie and event booking with features like interactive carousels, movie listings, and event details.

### HavenSpot

- A Developed a real estate web application that enables users to browse, search, and filter property listings, offering detailed information on each property. Integrated a user-friendly interface with admin functionality to manage listings, ensuring an intuitive experience for both buyers and sellers.
